Chemical Pumps

SD60 CHEM - A2050/2

Designed for safety with an excellent capacity, these pumps are suitable for over 500 chemicals.

Pumps can be fitted with either Nitrile, Butyl, EPDM or Viton diaphragms to enhance liquid compatibility.

Body parts are made from polypropylene or P.T.F.E., and the fastenings from stainless steel or hastalloy. The A2064 has a mild steel casing and 1" hose tails.

The A2050 & A2052 may be wall or base mounted by turning the ports through 90 degrees.

Technical Specifications & Dimensions:

A2050 – SD60 CHEM

Polypropylene Body – Stainless Steel Internal Screw

A2052 – SD60 CHEM

Polypropylene Body – Hastalloy Internal Screw

Capacity: 66 litres per minute

Connections: 1" BSP

Head: 4.5 metres

Lift: 6 metres

Weight: 1 kgs

170mm H x 150mm L x 170mm W

SD45R20 – A2064 (REAR)

A2064 – SD45R20

P.T.F.E. Body – Hastalloy Internal Screw

Capacity: 45 litres per minute

Connections: 1"

Head: 5 metres

Lift: 4 metres

Weight: 4.5 kgs

155mm H x 180mm L x 157mm W

SD45R20 – A2064 (FRONT)

Service Kits Available – For A2050/2:

S1851 – With Nitrile Diaphragms

S1851B – With Butyl Diaphragms

S1851V – With Viton Diaphragms

S1851E – With EPDM Diaphragms
